The electronic catalog

Index University Libraries collected on the Internet

In the process of automation of University libraries collected and made available indexes of university libraries on the Internet to save time and effort in identifying the beneficiaries of the vessel after the information acquired by the university libraries have been established on the index to the Internet through a system of KOHA Koha library management

Electronic databases

Within the framework of the deanship of the library Affairs caring for providing, organizing the latest information sources and makes it available for all the university members, as one of its main objectives, the deanship recently terminated its subscription in a number of 31 of electronic edusearches (of international periodicals). These databases as following:

1. Edusearch

Edusearch is considered to be a large informative educational gate represents the optimum and integrated solution for specialists and researchers of the educational and learning field. Edusearch covers all the educational and scientific periodicals issued in Arabic language. Moreover, it includes works and researches of conferences and seminars in the education and learning field. It represents the direct and the most comprehensive supply line for studies and educational researches available in the complete text.

Link to Edusearch:

http://mu.opac.mandumah.com

2. Sciencedirect

This sciencedirect covers all subjects related to agriculture, biology, arts, humanitarian sciences, chemistry, embryology, economic, management, accounting, chemical engineering, computer sciences, information technology, administrative sciences, earth science, energy, engineering, environmental sciences, immunology and bacteriology, materials, mathematics, dentistry, neurology, health and nursing sciences, pharmacy and toxics, astronomy and physics, psychology, sociology and veterinary medicine.

Link to Sciencedirect:

http://www.sciencedirect.com/science

3. Scopus

Scopus includes extracts and referential quotations about the intellectual production published in the scientific periodicals and web sources in all the human knowledge fields. Scopus helps in recognizing the intellectual production published in more than 15 thousands titles available for more than 4000 publisher. It also includes 12850 academic periodicals, 500 periodicals posted online, summaries and quotations, 700 scientific conferences, 28 millions of referential quotations for extracts and 13 millions of patents…etc.

Link to Scopus:

http://www.scopus.com/home.url

4. Gale Online Databases

It includes a number of the specialized databases in the different scientific and literary fields plus the experimental period for databases of books and periodicals by which the gross total of the electronic databases become 40 specialized databases.

Link to Gale Online Databases:

http://infotrac.galegroup.com/itweb/majmaah

5. Sage Premier with ++560 online full text journals

It includes the complete text for more than 360000 articles in more than 555 precise scientific periodicals among the best periodicals published all over the world, specialized in communication studies, criminology, education, health science, administrative science, material science, political science, psychology, sociology and urban planning and other knowledge in a variety of branches and fields.Link to Gale Online Databases:

http://online.sagepub.com/login

6. Academic Search Complete Plus

It includes the complete text of a number estimated by 4700 magazines and summaries for a number of 3330 magazines specialized in areas of sciences, technology and sociology.

Link:

http://search.ebscohost.com

7. Medline

It provides bibliographical information and summaries for more than 4800 medical periodicals. In addition to the complete text for more than 400 available electronic periodicals.

Link:

http://search.ebscohost.com/

8. IEEE/IEE Electronic Library (IEL)

It covers all subjects related to the electronic engineering, electrical engineering, computer science, information technology and the applied physics and other.

Link:

: http://ieeexplore.ieee.org/Xplore/guesthome.jsp

9. PQ Biology journals

It›s considered to be a major source of information in the biology field, including a range of widely spread magazines in the biology filed. Information type: complete text and photos of more than 53 specialized magazine in subjects of nutrition, infectious diseases, zoology, history of nature, environmental system and other. Coverage started since 1988.

Link:

http://proquest.umi.com/pqdweb?cfc=1

10. Science Journals

It›s a major information source in areas of science which lot of science colleges depend upon it. It includes complete text and photos in a number of 209 scientific specialized magazine in subjects of nutrition, infectious diseases, zoology, history of nature, environmental system and other. Coverage of complete text started since 1997, extracts since 1993 and indexes since 1983.

Link:

10. Science Journals

It`s a major information source in areas of science which lot of science colleges depend upon it. It includes complete text and photos in a number of 209 scientific specialized magazine in subjects of nutrition, infectious diseases, zoology, history of nature, environmental system and other. Coverage of complete text started since 1997, extracts since 1993 and indexes since 1983.

Link:

http://proquest.umi.com/pqdweb?cfc=1

11. ABI / Inform Global

It›s considered to be one of the most important available databases which provides information about commerce 30 years ago. It covers a great deal of commercial magazines and is used in most of economic and management college all over the world. It has a variety of information, including complete text, summaries, indexes and complete photos. It includes more than 1000 scientific magazines address the market attitudes, modern administrative methods, public strategies and international manufacturing subjects.

Link:

http://proquest.umi.com/pqdweb?cfc=1

12. Medical Library

It offers strong series in medicine and biomedicine. This database includes graphics, charts, photos, tables and other essential visual means used in the medical searches.

Link:

http://proquest.umi.com/pqdweb?cfc=1

13. Dissertations and Theses - Full Text

This database is specialized in Dissertations & Theses and it contains more than 2.4 millions data entries. It considered to be the most famous one in spreading theses by 65.000 theses per year. It includes more than 930.000 theses in a PDF format.

Link:

http://proquest.umi.com/pqdweb?cfc=1

14. LISA

It contains approximately 600 periodicals, in addition to books and searches in the field of libraries, information and relative indexing, classifications and information.Link:

http://proquest.umi.com/pqdweb?cfc=1

15. CSA Technology Collection

A Complete group contains multi-subjects databases.

- http://vnweb.hwwilsonweb.com/hww/getStartPage.jht ml;hwwilsonid=UL0YFPJZXCTVZQA3DIOSFGGADUNGI IV0?_DARGS=/hww/jumpstart.jhtml

16. Wilson Applied Sci and Tech FT

It includes audiology, aviation science, applied mathematics, artificial intelligence, quality science, automatic control, automotive engineering, chemical engineering, chemistry, civil engineering, communication and information technology, computer databases, software, building electrical and electronic engineering.

Link:

HYPERLINK

- «http://vnweb.hwwilsonweb.com/hww/getStartPage. jhtml;hwwilsonid=UL0YFPJZX...

17. StatRef References Collection (86 Titles)

It›s a medical database shows model references and titles by different publishers. It›s available in a feasible way for researchers in the medicine field. It has a variety of information, including complete text, extracts and indexes.

Link:

• http://online.statref.com/UserLogin.aspx?=StatRef

18. AskZad

It›s considered to be the memory of the Arabic journalism and a comprehensive source of information which fulfills the researchers, media professionals and officials inside and outside the Arabic world. This database is distinguished in the sense that it›s available in the Arabic language and it provides easy and advanced search; since you can search by article, author or journal name, otherwise by post date.

AskZad service in its new shape provide a range of databases for the Arabic searcher which cover the scientific and intellectual production in the Arabic world, including books, periodical, researches, thesis, dissertations, conference papers and also specialized lexicons and dictionaries in different languages and encyclopedias.

Link:

• http://www2.askzad.com/genpages/default.aspx

19. ERIC

It includes the largest digital library in the field of literary and educational sciences.

Link:

- http://search.ebscohost.com

20. Communication and Mass Media Com

It includes information in the field of journalism and media available in all types of readable, audio/visual means.

Link:

- http://search.ebscohost.com

Digital Library Plus (DL+)

You can access the following eight databases through subscription for the electronic library via this link:

- http://saudi.digitallibraryplus.com/

21. American Society Of Civil Engineers (ASCE)

It involves subjects of civil engineering, its materials, space engineering, road, highway and bridge engineering, management in the engineering fields and urban planning and development

Link:

- www.asce.org

22. American Institute of Physics (AIP)

This database covers all subjects related to physics

Link:

*   http://journals.aip.org

23. Emerald Full Text Plus / Emx175

This database covers all businesses, libraries and information sciences, accounting, auditing, economic, information management, library of collecting and managing development, libraries, information and services management, Technology, logistics, supply chain management, marketing, production operations, police administration, public administration, sector administration, quality and training administration, continuous vocational development and learning engineering, material science, environmental management, food and nutrition, public administration, health care administration, hosting and services administration, human resources administration.

Link:

*   http://www.emeraldinsight.com/

24. Database of MD Consult covers all medical and surgical specialties.

Link:

HYPERLINK

* «http://www.mdconsult.com/php/1008-269884080/homepage»

25. Cambridge University Press (CUP)

It covers all scientific subjects related to agriculture, anthropology, archeology, art, astronomy, Britain history, molecular biology, chemistry, classical studies, computer sciences, engineering, English and Arabic languages, European history, medicine, philosophy, physics, politics. Regarding the social aspect, it includes history, intellect, psychology, religion, sociology, zoology, botany.

Link:

* http://www.journals.cambridge.org/

26. British Medical Journals (BMJ)

It covers all sciences of clinical medicine, pediatrics, sport medicine, emergency medicine, cardiology, diseases, medicine ethics, neurology, nerves, psychology, and public health, Evidence-based Medicine (EBM), nursing and practicing management.

Link:

* http://group.bmj.com/products/journals

27. Oxford University Press (OUP)

This database covers multi-sciences, including humanitarian sciences, law, life science, mathematics, physics & medicine and social sciences.

Link:

HYPERLINK

- «http://www.oxfordjournals.org/»

28. Math Science

This database covers mathematics and statistics and computation.

Link:

- http://www.ams.org/mathscinet

The following are some database being subject to termination of subscription

29. OVID collection

30. ACM digital library

31. Royal Society of Chemistry Journals (RSC) gold

Soon there will be an objective coverage for each database separately. It›s worth mentioning that user name and password have been made public to all colleges, supporting deaneries and administrations within the university

Saudi Digital Library

Saudi DigitalLibrary

Your gateway to the world of knowledge

Largest gathering of academic e-books in the Arab world, where currently has more than (000 114), full-text e-book in various scientific disciplines, and has more than 300 global publisher like Elsevier, Springer, Pearson, Wiley, Taylor & francis, Mcgrawhill

And contain at books for publishers such as world-class academics: Yall University, Oxford University, Harvard University

Services:

Access to the full text of electronic books from anywhere and at any time.

Search by make (keywords - Full text - Title - Author - Subject - Posted ...).

Giving a range of advanced interactive services

Providing electronic reference service

Provide awareness information service

Provide uniform access to digital library

Registration steps in the digital library Saudi Arabia:

Step One: Login to the site of Saudi Digital Library

•   http://www.sdl.edu.sa/Pages/Default.aspx

And select «New User New user», and will be taken to a new page

Step Two: Access to the new page link

•   http://www.sdl.edu.sa/Pages/universities.aspx

The University will be selected from lists compiled the universities, and will be taken to a new page

Step Three: After you move to the new page you will find a statement to «privacy policy and use of digital library Arabia» Clicking on the word «OK»

Step Four: You will enter your data in accordance with the registration form through this link

http://www.sdl.edu.sa/Pages/UserRegistration.aspx

Note: You must enter your e-mail the university, and will not pay any attention to the General Post

After the registration process Stzer message reads «Dear User, Thank you for your subscription with us in the Digital Library, please wait for the approval of Director of the Digital Library, where you will receive an email notifying you of your approval of the special registration»

World Digital Library

Message library

World Digital Library offers free online format and multi-lingual important raw materials from countries and cultures around the world.

Objectives of the World Digital Library are:

- To promote understanding between countries and cultures;
- Expand the size of cultural content on the Internet and its diversity;
- Provide resources for educators, scientists and the general public;
- Building the capacity of partner institutions to narrow the digital divide within and between States.
- Content and method of research and responsibility
- Allow the World Digital Library to explore cultural treasures from around the world, study and enjoyment, all in one location and a variety of ways. These include cultural treasures but not limited to manuscripts, maps, rare books, sheet music and recordings, films, prints, photographs and architectural fees.

Can browse the material on the global digital library easily by the time and place, subject, material type and contributing institution, and can be reached through an open search in multiple languages. Of the benefits of geographical blocs interactive timeline and view the advanced capabilities of the images and explanatory. Additional information is also available

through the descriptions of the level of material and interviews with the trustees on certain materials.

Available navigation tools and content descriptions in Arabic, Chinese, English, French, Portuguese, Russian and Spanish. There are also many other languages represented in the same books, manuscripts, maps, photographs and other raw materials available in their original language.

Was developed by the World Digital Library team in the United States Library of Congress with contributions from partner institutions in many countries and the support of the United Nations Educational, Scientific and Cultural Organization (UNESCO) and the financial support from a number of companies and private institutions.

Digital Repositories

Digital repositories are considered one of the modern digital information institutions on the internet. These digital repositories were created within initiatives of free access to information such as Institutional Digital Repositories which usually follows a university and research or scientific association. Also, these repositories produce some intellectual work of for employees at the scientific institution for free. They give free access to these intellectual works with no restrictions. These institutional digital repositories are regarded cornerstone for scientific and research institutions evaluation as some scientific institutions are preparing some sort of organization in the institutional digital repositories that are affiliated to the universities across the globe.

How to take advantages of digital repositories on the Internet

To benefit from digital repositories, you need to type «Institutional Digital Repositories» in any of search engines such as google, or search in any of the open resources repositories guides such as Open Doar. This catalogue is one of the important catalogues that aim to explain how to access and utilize these digital repositories. It also   limits 2086 digital repositories until 2011/10/09 in the fields of the humanities, social sciences, medicine, physics, botany and zoology, information and computer technology, libraries and information and geophysics. You can access and utilize these catalogues by researching in these repositories through the following link:

: http://www.opendoar.org/find.php

Some of the digital repositories in the Arab world:

1. Digital Assets Repository in Alexandria library

http://dar.bibalex.org/webpages/dar.jsf

2. Digital Assets Repository for American University in Cairo

http://dar.aucegypt.edu:8080/jspui

Digital Assets Repository for British University in Cairo

Digital Assets Institutional Repository for department of libraries and information in Almanoufiyah University

 IDR-MDLIS

http://art.menofia.edu.eg/libsite/lib_dep/reposite/index.htm

Repository of King Fahad University for Petroleum and Minerals

http://eprints.kfupm.edu.sa

Repository of Qatar University

http://qspace.qu.edu.qa

Loan service and e-booking

The philosophy of this service is summarized in giving the opportunity for all male & female affiliates of the university to book sources of information in the possession of another beneficiary of the university libraries, as well as completing the borrowing process electronically through the beneficiary›s library account. Such service will be activated immediately after completing automation of the university libraries such as automatic indexing and classification of information resources, link between the library management system Koha and the University automated systems holding data of all employees and affiliates of the university teaching staff members, students and administration staff. The beneficiaries are now able to identify the information sources of a particular college or in all university libraries through the unified index of university libraries through this link:
