B. Course Objectives and Learning Outcomes

1. Course Description

This two-credit hour's course consists of theory and practical, both having 1 credit hour each.

The theoretical part (1 credit hours) is designed to provide dental students with basic knowledge of different lesions seen in the oral cavity and its identification based on their appearance

The practical part is designed to train them to meet and greet with the patients, taking a detailed case history and understanding the patient concerns to assist in the treatment planning.

2. Course Main Objective

- a. This course intends to take the students forward in terms of understanding of various methods of diagnosing oral infections.
- b. Students will be trained in understanding different lesions of oral cavity and its approach towards adequate diagnosis.
- c. Students will be trained in building the attitude of asking about the specific lesions and improve the approach towards the questioning related to the lesions and hence rule out the negative symptoms to come to final diagnosis.
